2. Chargeback History

Original transaction: 2026-01-29, \$689.95, reason code 4534 -- duplicate processing. The card member reported being billed twice for a single order (order #SOG-44821). A chargeback for the duplicate \$689.95 was filed on 2026-02-04.

The merchant submitted representment on 2026-02-26 asserting two distinct orders shipped. Supporting documents: two shipping confirmations and a signed delivery receipt.

3. Decision & Communication

On review, the two shipping confirmations reference the same tracking number, supporting the card member's duplicate-charge claim. Decision: representment rejected; the \$689.95 chargeback stands and the credit to the card member is final. The merchant was notified at the contact in Section 1 and advised of pre-arbitration rights. The card member was sent a resolution letter confirming the permanent credit and the case number for reference.
