2. Reason for Hold

An automated fraud rule placed a temporary hold on the account after three high-value transactions in two countries within four hours: a \$4,210 charge in London, a \$3,775 charge in Dubai, and a \$5,090 charge in New York on 2026-02-28. The velocity and geography pattern triggered rule FR-VEL-09.

The card member called to confirm that the London and Dubai charges were fraudulent and the New York charge was legitimate.

3. Escalation & Actions

Verified identity using two-factor knowledge questions and the SSN on file in Section 1.
Actions: (1) confirmed New York charge as valid and released it; (2) reversed the London and Dubai charges totaling \$7,985 as fraud; (3) closed the compromised card ending 3007 and ordered a replacement to the address in Section 1; (4) escalated to the Fraud Operations team for pattern analysis. Replacement card expected within 5-7 business days.
